Comparison - Intrinsic vs Extrinsic. When it comes to intrinsic vs extrinsic motivations, young children are usually drawn to activities they have an intrinsic motivation to perform. Children don't need a reward to paint pictures or play games. They often need little extrinsic motivation to learn and pay attention in school.

An intrinsic property is independent of the size of a sample or the amount of matter that is present. Examples of intrinsic properties include density and specific gravity.

Intrinsic Versus Extrinsic Properties
In contrast to intrinsic properties, extrinsic properties are not essential qualities of a material.
