### **Handouts - Biofuels**

Abstract In this lab we learn about enzyme function within the context of biofuels.

Biofuels are fuels that are derived directly from living matter ( 1 ).

In this lab we use the enzyme cellobiase (used to break down non-food/feed plant products for production of ethanol) to study

The enzyme studied in this experiment is called "catalase."

Download File

PDF Biofuel

Enzyme Lab

Catalase is an enzyme found in nearly all living organisms.

Catalase has one of the highest turnover rates of all enzymes. One molecule of catalase can convert millions of molecules of hydrogen peroxide to water and oxygen per second.
