I am new to Cisco servers and we have purchased 3 UCS C220 M3 servers. For one of them, I would like to basically install an Ubuntu OS (14.04). I have tried hard but unsuccessfully to install this OS on the server. On this server, I have only one physical hard drive because I am not really interested in getting RAID on this server.

...

Secondly how did you order the server, was it ordered as just the UCS C220 M3 or as a Business Edition 6000 (BE6K) system? If you ordered the BE6K option VMware ESXi should have come pre-installed, otherwise you have to obtain and install VMware ESXi so that you can boot the system off of that operating system and begin creating virtual machines.
