...

In an ideal world, cognitive and educational psychologists would have created a translational educational science that would be eagerly adopted by education schools and educators who would

want to improve education on the basis of the latest research findings.

Applying Cognitive Psychology to Education: Translational ...

In its weakest form, cognitive science is just the sum of the fields mentioned: psychology, artificial intelligence, linguistics, neuroscience, anthropology, and philosophy. Interdisciplinary work becomes much more interesting when there is theoretical and experimental convergence on conclusions about the nature of mind.
