Exterior Vinyl Trim Molding - PVC Trim Molding | Ply Gem

PVC trim expands when it's hot and contracts when it's cold. As a general rule of thumb, if you're installing trim in temps higher than 80 degrees F, go ahead and fit joints tightly. If it's between 60 and 80 degrees, leave a 1/16-in. gap for every 18 ft. of length. Below 60 degrees, leave a 1/8-in. gap.

Tips for Working with PVC Trim | The Family Handyman

PVC trim boards will expand and contract with wide variations in temperature. If you're installing trim in temps higher than 80 degrees F, cut pieces to fit tightly. If it's between 60 and 80 degrees, leave a 1/16-in. gap for every 18 ft. of length. Below 60 degrees, leave a 1/8-in. gap.
