Laboratorians depend on field personnel to submit samples that will enable them to make a diagnosis. The quality of the samples and the information accompanying the samples greatly facilitate the ability to pick the best test and get results that will be useful for the field diagnostician. The purpose of this manual is two-fold.

This manual is a guide and basic reference for personnel whose  
duties require the use of rig-ging. It is intended for use in  
training and as a reference manual for field operations. It cov-ers  
the types of rigging and the application of fiber rope, wire rope,  
and chains used in various combinations to raise or move heavy  
loads.

replaced Field Manual 34-52 (published in 1992). The new manual specifically prohibits many of the controversial enhanced interrogation techniques (including " waterboarding ") which brought the matter to public attention, and also stipulates that the list is not all-inclusive of prohibited actions.
