Owners Manuals | Lawn & Garden Products | Honda UK

All modern Honda mowers are auto choke, that means that you don't need to fiddle around with any levers to start the engine, but if your mower is a few years old, it may have a manual choke lever. Which ever type you have, your Honda should start on the first or second pull, assuming of course, everything's in order.

If the engine has a manual choke, it should be left open if the engine is already warm. To use a recoil-starter, pull the starter grip until resistance is felt, then give it a hard pull to turn over the engine. To use an electric starter, turn the starter switch to "START" and hold it there until the motor starts.
