Finally, avoid over-tightening the bolts or fasteners when replacing your tires. This can cause serious damage to your bike and can even be dangerous. For instance, if you over-tighten the bolts on your front wheel, it can cause the forks to compress too much, making steering more difficult and could potentially cause an accident. For the rear tire, over-tightening can damage the swingarm.

This myth is perpetuated by the tech media. But as Rumelt points out, growth isn't automatically good. Most companies don't need to be, and can't be, as big as companies like Google, Facebook, Apple, and Amazon. Tech companies grow in an artificial way, i.e. spending the money of their investors, not money they're making from customers ...

Yes, it's a shame. But, she saw a 'need' in the market so she took advantage of it to make money. She is similar to food companies. They, too, don't want to point out the obvious - too many fat people (too much money to lose). So as one tagline put it....'crunch all you want, we'll make more'...they just left out the fatty part.
