Reason for use ...! [] While it remains a stand-alone document, ISO 13485 is generally harmonized with ISO 9001. [] A principal difference, however, is that ISO 9001 requires the organization to demonstrate continual improvement, [] whereas ISO 13485 requires only that the certified organization demonstrate the quality system is effectively implemented and maintained. [] Additionally, the ISO 9001 requirements regarding customer satisfaction are absent from the medical device standard.
