## **Honeywell Bendix/King KI-229 Radio Magnetic Indicator (RMI)**

The King KI-229 Radio Magnetic Indicator (RMI) combines three data points on one indicator. The current aircraft heading from an HSI is shown on the card. The magnetic headings to VOR and NDB stations are shown by the twin needles. By combining all this information visually, less interpretation is required.

The King KI-228 ADF Indicator is a more advanced version of the standard KI-227 ADF Indicator. Like the KI-227, the KI-228 is used as part of a KR-87 ADF System. The difference is that the KI-228 may be linked to two KR-87 Systems. This allows the KI-228 to show the bearing to two NDBs at the same time, on the same indicator face.
