McIntosh - Product Support

Right now I am in the market for a vintage McIntosh amp. I need some help though because I'm trying to find a good one that won't break the bank (less than 1.3k). I took the 7100 to my lab and ran some tests on its power output and it matches the owners manual curves exactly - 195W into 6 ohms continuous!!! Just an incredible little amp. I am now sticking with McIntosh in getting another Mc amp with autoformers and meters but I am definately keeping this little gem.
