Design of rectangular microstrip patch antenna. Abstract: The purpose of this paper is to design a microstrip rectangular antenna in Advance Design System Momentum (ADS). The resonant frequency of antenna is 4.1GHz. The reflection coefficient is less than -10dB for a frequency range of 3.1GHz to 5.1 GHz. The proposed rectangular patch antenna has been

Microstrip Patch

A: A microstrip antenna, also called a patch antenna or printed antenna, is an antenna which is primarily a two-dimensional flat structure (Figure 6. In its simplest form, it uses a conducting “patch” one-half wavelength long, so that the metal surface acts as a resonator similarly to the half-wave dipole antennas.
