Pennacchi Asset Pricing Solutions Verduraspueros

Finance 591: Theory of Asset Pricing This doctoral-level course examines single- and multi-period consumption and portfolio choice models and their equilibrium asset pricing implications. Both discrete-time and continuous-time models are covered, as well as the valuation of contingent claims using martingale and stochastic discount factor approaches.

Teaching - George G. Pennacchi

We then turn to dynamic models of asset pricing where we discuss classic asset pricing anomalies in the context of consumption based models. We introduce some well studied solutions to these anomalies including the introduction of Epstein-Zin preferences, ambiguity aversion and habit formation.
