Software Engineering: A Practitioner's Approach - McGraw Hill Education

System integration, in this model, may be part of the development process rather than a separate activity. Component software engineering has the obvious advantage of reducing the amount of software to be developed and so reducing cost and risks. It usually also leads to faster delivery of the software. System boundaries should be defined and ...

V&V is often confused with IV&V: The role of V&V is an inherent part of software management and engineering, and even specialized labor categories internal to software lifecycles. IV&V is the process of V&V carried out by an independent group other than the principal software managers and engineers, for the purpose of ensuring objectivity. IV&V is often designated to be
