## Developing Web Apps with SAPUI5 | openSAP

SAPUI5 separates the front-end development from back-end development. For example, if you have an existing functional OData service, you can develop an SAPUI5 application for that service without touching the back-end—just put the SAPUI5 application on top of the OData service. The most popular frameworks for building web applications are:

## SAP Fiori vs. SAPUI5: What Is the Difference? (+ Examples)

Thanks for explaining and sharing code to display smartform using OData and consume it in SAPUI5. I am able to consume smartform in my SAPUI5 application. When I executed the SAPUI5 application, I observed that OData service is being called three times. I guess one when "oModel.Read" is being called, second when iframe is being loaded and third ...
