One simple avenue that can assist in tracking the seasons of the church year for worshippers, as well as providing a visual context for worship, is the use of Colors of the Church Year in the sanctuary. Different colors are associated with different seasons, and the changing colors of communion table and pulpit coverings (called paraments), or wall banners, provide visual clues for the seasons.

Meteorological seasons are reckoned by temperature, with summer being the hottest quarter of the year and winter the coldest quarter of the year. In 1780 the Societas Meteorologica Palatina (which became defunct in 1795), an early international organization for meteorology, defined seasons as groupings of three whole months as identified by the Gregorian calendar.
