Select Fire Ak 47 Conversion

After making these parts, you could have a select-fire rifle. The selector is moved to the upper position. You will realize that the rifle is safe. When it is placed in the lower part, this is a semi. And when the selector is moved in the middle position, you will have the full-automatic AK 47 rifle.
Conclusion

AK 47 Full Auto Conversion Guide: Easy-to-Follow Blueprint

The AK-47 is a select-fire, 7.62×39mm, air-cooled, long-stroke-piston gas-operated, magazine-fed rifle, with a rotating bolt. It was designed to be a simple, reliable automatic rifle that could be manufactured quickly and cheaply, using mass production methods that were state of the art in the Soviet Union during the late 1940s.

The AK-74u bears many similarities to weapons in the assault rifle class. It is the only submachine gun with noticeable sway (four degrees, and it sways quickly, the same amount and speed as the AK-47), and it also has the same wall penetration and the higher zoom of assault rifles. Its hip fire accuracy is reduced to that of an assault rifle ...
