The Descent Of Love Darwin

Upon its publication in 1871, Charles Darwin's *The Descent of Man and Selection in Relation to Sex* sent shock waves through the scientific community and the public at large. In an original and persuasive study, Bert Bender demonstrates that it is this treatise on sexual selection, rather than any of Darwin's earlier works on evolution, that provoked the most immediate and vigorous response from American fiction writers.

Today the focus is mainly on Darwin's *Origin of Species*. But in the 828 page sequel in which he tells us he will now deal with human evolution, *The Descent of Man*, Darwin writes only twice of “survival of the fittest,” but 95 times of love. He writes of selfishness 12 times, but 92 times of moral sensitivity.

Darwin's Unfolding Revolution

The Descent of Man, and Selection in Relation to Sex is a book by English naturalist Charles Darwin, first published in 1871, which applies evolutionary theory to human evolution, and details his theory of sexual selection, a form of biological adaptation distinct from, yet interconnected with, natural selection.
