As a company goes through its transition into a digital enterprise, it often stops short, not realizing the full benefits of its digital enterprise. When companies begin, information is placed into a Word or Excel file. Simulation or modeling programs are started, but nothing is linked.

Transitioning to the digital enterprise

To successfully transition to the digital enterprise you need to have both the digital twin and digital thread. Now, the digital twin has been around for decades. Essentially, the digital twin is a virtual representation of a product or process in the proper context so teams can analyze, study, and improve the product or process under development.
